

*“The Simple Solution to a  
Complex Problem”*

**You Can't Protect your Patients of Tomorrow using Yesterday's Cleaners**

**Disinfect & Clean What  
You Can't See**

# How can you treat all surfaces in a limited amount of time?

## Did you know?

According to the NIH up to 80% of all diseases are transmitted through surface contamination.

With the average cost per Healthcare Aquired Condition being between 20-28k of non-reimbursed funds hospitals can no longer take the chance on the cleaners of yesterday doing a thorough enough job to protect their patients of today.

The IsoKlean System is a patent pending, cost effective, disinfectant system that uses a combination of an EPA registered hospital grade disinfectant and cleaner with a rapid delivery method that wraps around all reachable surfaces in a matter of minutes.

The isoKlean system can disinfect an average hospital patient room in less than one minute using our no-wipe system- Leaving NO surface untouched!

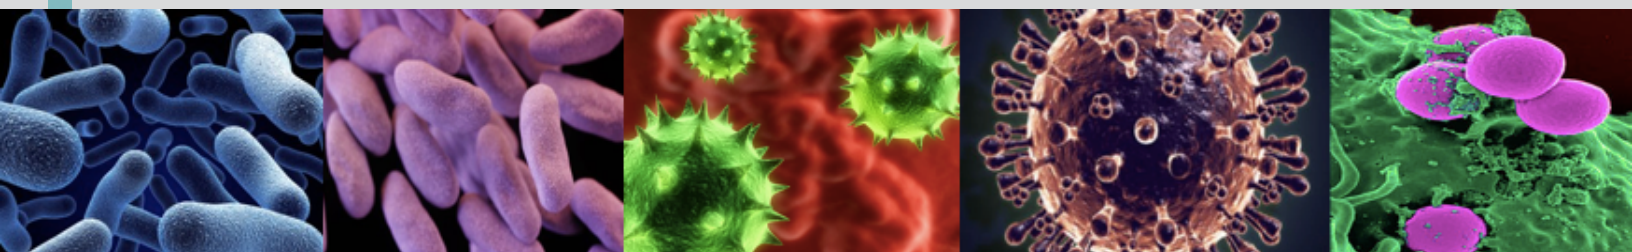

## Benefits of the IsoKlean System:

### Patented Disinfectant:

- One step no rinse disinfectant
- EPA Registered- Antimicrobial. Multipurpose formulation cleaner, disinfectant and deodorizer
- Effectively penetrates surface bacteria
- Fast acting, dries on contact
- Meets AOAC Use-Dilution Test Standards for hospital disinfection

### Unique Delivery System:

- Low pressure, Low volume delivery system, complete wrap around coverage, no vents to cover, no special paint or added deodorizer required
- Application time is less than 1 minute per patient room and 2 minutes per average operating room

## What Pathogens can IsoKlean help to eliminate?

Our patented products and processes leave all reachable surfaces disinfected, eliminating gram positive and negative bacteria, viruses, molds and mildews. ISO-5 is a broad-spectrum bactericide, fungicide and virucide. Effectively kills the top 15 Multi Drug Resistant Organisms (MDRO). Effective against MRSA, VRE, E-Coli, CRE, Klebsiella, Acinetobacter Baumannii, Norovirus (Norwalk), SARS, Human Coronavirus, HIV strains, Hepatitis strains, Influenza viruses and more.

**Ask how you can get started today for less than \$2,000!**

### Product Set:

- iso 5**: Disinfectant, EPA registered, 2oz per gallon of tap water (Kills ESKAPE Pathogens)
- iso-10**: Patent pending EPA registered Hospital Grade Disinfectant and Cleaner (1 prepackaged dissolvable packet per 1 gallon of warm tap water)
- IsoKlean Hand-held applicator**

Truly a GAME CHANGER in disinfection. The ISOKlean System brings ease, speed, efficacy, practicality and affordability in one advanced system.
